

~ Faroudja Offers Toner for the Lexmark Optra C 510~

Faroudja Toner has released color toner in bottles and bags for the Lexmark Optra C 510. The black bottles are available in 260 grams, while each of the colors is in 210 grams. 10 kilogram bags are also sold, and can be purchased individually or in multiple quantities.

"We have toners for other Lexmark printers, such as for the Optra C & C 710, and our customers have been pushing us to develop more Lexmark toners" explained president Phil Faroudja. "We have had quite a few inquiries for this particular cartridge, so after a long testing process we feel our customers are going to be really pleased with the quality." Fortunately, the cartridges are relatively easy to recycle and do not require fuses or chips.

Faroudja Toner, in San Carlos, California, additionally stocks color toner for Hewlett-Packard, Tektronix, Minolta QMS and supplies a wide range of parts and recharging tools.
