

~ Faroudja Offers Toner for the Xerox 7300 ~

Faroudja Toner now carries toner in bottles and bags for the Xerox Phaser 7300, it was announced. "The Xerox color phaser toners are getting popular, and we get calls ever week for them, so we have been focusing on them more" explained company president Phil Faroudja. "On the 7300 we have been working for several months, as we never release a toner until the quality meets our standards. But now we feel our customers will be pleased with what they see with this toner." The bottles are offered in 460 grams for all four colors; bags for the colors are available as well in 10 kilograms. "This continues our Xerox color toner development -- we already have the 7700 -- and next we plan to introduce Xerox 6250 toners" added Faroudja.

Faroudja Toner, located in San Carlos, California, additionally stocks color toner for Hewlett-Packard, Minolta, & Tektronix, and supplies a wide range of parts and recharging tools.
